Export clients can outsource their logistics completely to Coastline Logistics (Pty) Ltd, knowing that this vital operation is in capable hands. Furthermore, the company's one-stop logistics service is flexible to the extent that we will tailor the scope of our services to meet your unique needs.

Pricing is customized according to the services that the client requires and based on the agreed, fixed rates for the services you select. Furthermore, you benefit directly from special rates we negotiate with our suppliers.

### **Planning**

Precision planning is crucial for the successful export of fruit, with continuous cold chain maintenance from packing stations/warehouses all the way to market locations. Coastline Logistics provides the best combination of logistics planning to look after your produce, including

- Inland transport
- Cold stores
- Load specifications
- Airfreight
- Seafreight (conventional vessels and container vessels)

### **Negotiations**

Given our bargaining power to negotiate favourable rates for clients throughout the logistics/supply chain. This ensures that our clients have a competitive edge on the cost of delivered product.

Coastline Logistics selects the best service providers for the purpose, thus making sure that the fruit reaches its destination in the fastest, most efficient way.

### **Support**

There are many potential pitfalls in the exporting of fruit, especially for the inexperienced. Coastline Logistics has the expertise and knowledge to help you ensure the success of your business.

We offer the following support services:

- Competitive rates
- Status reporting
- Handling protocols
- Handling equipment
- Sea Freight negotiations

### **Monitoring**

All the planning in the world cannot guarantee success. It is necessary to ensure that what is planned, takes place. We continuously monitor the cold chain and ensure that fruit remains within its handling protocols at depots. By assisting at the loading of containers we ensure that the loading is done to specification.

Coastline Logistics can monitor the following:

- Cold stores
- Stock
- Protocol adherence
- Loading

### **Transport Management**

Transport lies at the heart of fruit logistics. Coastline Logistics manages inland transport (road or rail), sea freight (containers and conventional vessels) and airfreight.

### **Clearing and forwarding**

No job is complete until the paperwork is done. Efficient and comprehensive paperwork is vital in the export of fresh produce where incorrect or incomplete export documentation can lead to costly delays.

Coastline Logistics is unique in executing the documentation process. Information obtained from cold stores is transmitted, feeding through our own in-house IT system, while automatically generating electronic documentation and connecting via EDI links with role-players such as SARS and shipping lines. This eliminates human error and enables us to launch real-time status of your documents on our website which results in quicker turn-around time of documentation. This information is readily available to both shipper and receiver.

Our highly specialized and experienced staff members focus on clearing and forwarding, including export formalities and documentation to all traditional markets for South African fruit, affording you complete peace of mind.

We also keep up to date with the documentation requirements of new markets and offer C&F services to all protocol markets.
